## SOFTWARE ENGINEER

---

I am seeking a challenging entry-level position in the field of software engineering, where I can apply my technical skills and knowledge gained through academic coursework and personal projects. I am eager to learn and grow in a professional environment, and am committed to contributing to the success of the team and organization.

## TECHNICAL SKILLS

---

**Languages** : C/C++, Python, Assembly  
**Databases** : PostgreSQL  
**Dev Tools** : CLion, Vim, Git, Gitlab, Github, CI/CD, Bash, Docker + Docker-compose  
**Knowledge** : Algorithms and Data Structures, STL, Concurrency, Discrete Math, Real Analysis

## EDUCATION

---

**Moscow Institute of Physics and Technology**  
*Bachelor of Phystech School of Applied Mathematics and Computer Science*

Moscow, Russia  
Sep 2021 – Dec 2025

## PROJECTS

---

- |   |                         |
|---|-------------------------|
| <b>Battleship game</b>  | <i>Python, Git</i>      |
| <ul style="list-style-type: none"><li>• A simple game that can be played by two people on the same computer</li><li>• Written with Pygame, easy to run</li><li>• Has a nice UML Class Diagram</li><li>• Uses Pygame for GUI</li></ul>   |                         |
| <b>Telegram Bot</b>   | <i>Python, Git</i>      |
| <ul style="list-style-type: none"><li>• A simple bot that responds to simple requests and has a newsletter</li><li>• Uses heroku PostgreSQL</li><li>• To deploy, just run a simple bash script</li></ul>  |                         |
| <b>PDP-11 Emulator</b>  | <i>C, Assembly, Git</i> |
| <ul style="list-style-type: none"><li>• Developed a standard PDP-11 emulator</li><li>• Supports most opcodes</li><li>• Covered with standard unit tests</li></ul>   |                         |
| <b>Concurrency framework</b>  | <i>C++</i>              |
| <ul style="list-style-type: none"><li>• Framework for concurrency</li><li>• Competitive tasks are launched in the scheduler using fibers (lightweight threads)</li><li>• Implemented futures to return a result from asynchronous values</li><li>• Scheduler can be easily replaced with any executor</li></ul> |                         |
